Discussions

Overall, PA, Organized Sport Participation, Physical Education, and a School Climate - ENC due to insufficient data.

A grade C - School indicator, grade D: Active Play in schools - ENC due to insufficient data and subjective observations.

Active Transportation and Sedentary Behavior grades were based on one study (Bulfield et al., 2010).

PA: a couple of studies are available with insufficient sample sizes (e.g. 4); no data on other aspects of physical activity in childhood. PA: only one study (5) which reports overweight/obesity of Botswana children and youth.

Data pacity in PA and its influencing mechanisms among Botswana school-aged children and youth.

Botswana’s 2018 Report Card on PA has provided the status or prevalence of PA among Botswana children and youth, giving direction to the way forward.
